**Similar Resumes**

## Overview

- Specialties: Strong object orientated PHP / PHP5 web programming (5 years experience using CakePHP as php framework), MySQL/PostgreSQL DB architecture/development, JavaScript (3 years experience using ExtJS javascript framework, but also I have expertise in using jQuery, and overall more than 6 years experience using JavaScript), design patterns, web services, AJAX, HTML, XHTML, CSS, XML, JSON, SVN/Git, Linux, Apache, Flash, Photoshop, mockup/design/conversion of photoshop layouts/mockups to valid HTML/CSS web pages, SEO optimisation.
- Personal statement: "Nobody in life gets exactly what they thought they were going to get. But if you work really hard, and you're kind, amazing things will happen. Neverless, if you set your goals ridiculously high and it's a failure, you will fail above everyone else's success."

## Objective

- Application architect/developer in a wide variety of business applications.
- Always interested in big projects/start-ups.
- I want to become a successful Product Manager.

## Employment History

| 08/2004-02/2006 | **Sitex Design, SRL** | Iasi, Romania |

web developer

| 10/2006 - 11/2008 | **Euromed SRL** | Bacau, Romania |

project manager

- type of business: Computer Software industry (1 - 10 employees)
- Developed several websites, using mostly CakePHP as main development framework, but also side technologies as jQuery, AJAX, XHTML, CSS and DRY/KISS methodology

- Developed a web application for a high-school using ExtJS as client-side framework and CakePHP as server-side framework. Techniques used: REST web service (JSON objects were returned on HTTP requests), components were loaded on demand, the whole app was acting like a desktop application, multi-level multi-users interaction, provide security mechanism, real-time reporting using graphs, upload/download tools using SWFupload, API used: Google API, LinkedIn API, Flickr API, etc.
- Developed a web application for a real-estate agency, using ExtJS as client-side framework, CakePHP as server-side framework and Adobe AIR to build a desktop-like app using web technologies. Techniques used: REST web service (JSON objects were returned on HTTP requests), components were loaded on demand, the whole app was acting like a desktop application, multi-level multi-users interaction, provide security mechanism, Google Maps API used, EXTJS theme customization (using CSS and customized icons).
- Developed some modules for a CRM application, using preconfigured XML files and ExtJS as main framework for a client based in Netherlands.
- GUI development
- As project manager: creation and execution of project work plans and revision as appropriate to meet changing needs and requirements, effectively application of internal methodology and enforcing project standards, identification of business development and "add-on" sales opportunities as they relate to a specific project, facilitates team and client meetings effectively, holds regular status meetings with project team.

| 12/2008 till now | **Rainmaker Systems Inc** | London, UK |

senior web developer

- type of business: Outsourcing/Offshoring industry (over 1000 employees, NASDAQ: RMKR)
- started working at Monkeehouse LTD in December 2008, then Monkeehouse LTD was bought by Optima Consulting Partners, then Optima was bought by Rainmaker in January 2010.
- Developed several websites, using mostly CakePHP as main development framework, but also side technologies as jQuery, AJAX, XHTML, CSS and DRY/KISS methodology.
- Developed a web application (project management category), using ExtJS as client-side framework, CakePHP as php server-side framework. Software deployment model: Software as a Service (SaaS), similar to BaseCamp or Severa. EXTJS theme customization (using CSS and customized icons), multi-level multi-user interaction, real-time reports, scalability optimisation, advanced caching techniques, heavy use of latest trends in web development, high-level of interactivity. The app has two big modules: client version, used by various clients, basically the main interface, and the admin version, built entirely in ExtJS, to manage the client acounts, their data (employees, clients, projects, project components, tasks, timesheets, settings, etc), internal custom reporting capabilites, etc. Performed product demos to customers. I set and managed client expectations.

## Education
